PROFESSIONAL SUMMARY

DevOps Engineer and Linux Administrator with over 2 years of experience in maintaining and automating Linux infrastructures. Proven ability to manage environments with 150+ virtual machines, develop Python/Bash automation scripts, and deploy containerized services. Passionate about building reliable systems, automating workflows, and expanding expertise in Kubernetes and Infrastructure as Code (IaC).

TECHNICAL SKILLS

Programming & Frameworks: Python, FastAPI, Django, ARQ, Bash / Shell Scripting
Containers & Virtualization: Docker, Podman, Buildah, Firecracker, KVM, QEMU, Virtio
Monitoring & Observability: Prometheus, Grafana, SigNoz
Databases & Caching: PostgreSQL, Redis, SQLite
DevOps & Config Management: Ansible, Git, CI/CD Tools
Operating Systems & Networking: Linux, SSH, TCP/IP, DNS, Networking
Architecture Concepts: Microservices, Event-Driven Architecture, Layered Architecture, Outbox Pattern, Asynchronous Processing, High Availability

WORK EXPERIENCE

DevOps / Python Developer **Present**
NewHorizon *Mashhad, Iran*

- Developing and maintaining scalable infrastructure and automation scripts.
- Implementing CI/CD pipelines and integrating Python-based tooling to streamline operations.

DevOps Engineer **2+ Years**
Part Software Group *Mashhad, Iran*

- Maintained and monitored infrastructure for banking services and high-traffic systems in a Linux environment.
- Managed infrastructure comprising over 150 virtual machines and production services.
- Developed Python tools and scripts to automate operational processes and reduce repetitive tasks.
- Participated in deploying and managing services using Docker, PM2, and Linux.
- Collaborated in CI/CD processes to improve deployment and maintenance workflows.
- Troubleshot production issues using logs, monitoring, and system performance analysis.
- Worked in Agile teams, collaborating closely with development teams to resolve operational issues.

Programming Instructor **Present**
Radman Technical and Vocational Institute *Mashhad, Iran*

- Teaching programming fundamentals and Python to students.
- Designing practical exercises and projects to strengthen problem-solving and algorithmic thinking skills.
- Simplifying technical concepts for individuals without a programming background.

EDUCATION

B.Sc. in Computer Engineering **2024 – Present**
Islamic Azad University of Mashhad *Mashhad, Iran*

CERTIFICATIONS

- **Associate DevOps Engineer** – ArvanCloud (2025)
- **Harvard CS50 Computer Science** – Harvard University (2024)
- **Harvard CS50 Python** – Harvard University
- **Advanced Python & OOP** – Quera
- **Task-oriented Course in Linux** – Quera (2022)
- **Fundamentals of Python & Algorithmic Thinking** – Quera (2022)

ACHIEVEMENTS & VOLUNTEERING

- **DevOps Finalist** – Tech Olympics 2026
- **Technical Lead** – CodeStorm Student Programming Competition
- **Volunteer** – Mashhad Linux Users Group (LUG), supporting and educating Linux users.
